

# Mantix AI

## Revolutionizing SIM Card sales Management for Safaricom Distributors

From Idea to Income: AI-Powered SIM Sales Operations in Your Pocket

# The Challenge: Complex SIM Management Operations

Manual tracking and reporting processes

Lack of real-time insights and analytics

Fraud detection requires constant manual monitoring

Distributors spend hours on administrative tasks

No predictive capabilities for inventory or performance

Complex interfaces that require technical expertise

# Meet Mantix AI: Your Intelligent SIM Management Copilot

## AI-powered natural language interface

Interact with your data simply by asking questions in plain English.

## Real-time tracking with predictive analytics

Stay ahead with live data and forecasts for optimal decision-making.

## Mobile-first design for on-the-go management

Manage your operations from anywhere, at any time, right from your phone.

## Built specifically for Safaricom sim sales distributor ecosystem

Tailored solutions that integrate seamlessly with existing Safaricom operations.

# Powered by Advanced AI Technology

## Natural Language Processing

Ask questions in plain English, get instant, accurate answers.

## Predictive Analytics

Forecast trends and performance to optimize inventory and sales strategies.

## Smart Recommendations

AI analyzes data and suggests optimizations for peak efficiency.

## Automated Reporting

Generate comprehensive reports instantly, freeing up valuable time.

# Seamless User Experience

## Simple Queries

"Show me regional performance" → Instant insights without complex commands.

## Mobile App

Native Android application for powerful, pocket-sized management on the go.

## Real-time Dashboard

Live tracking and monitoring for immediate oversight of all operations.

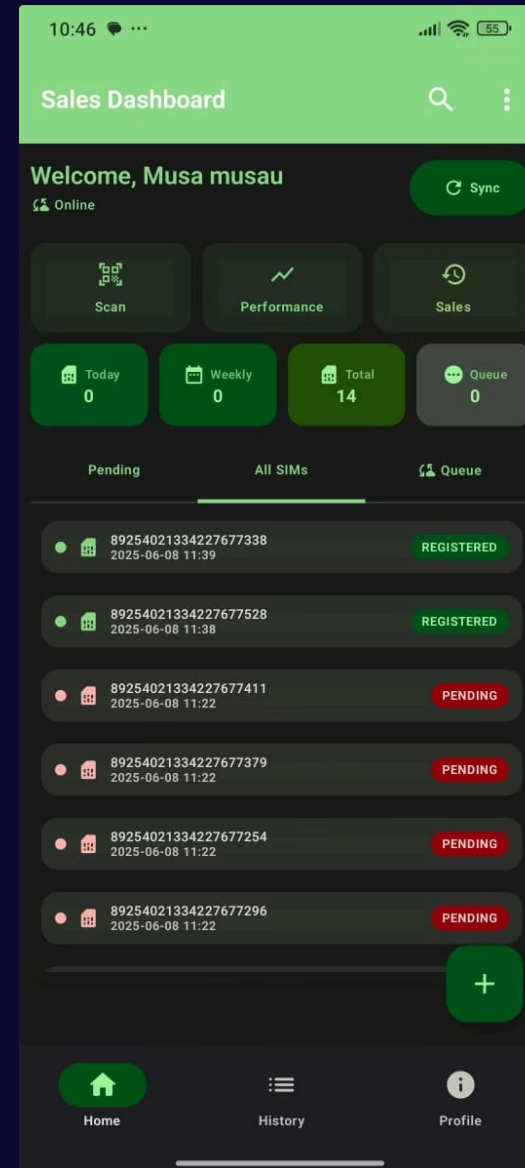

## Automated Alerts

Proactive notifications for issues, allowing for quick response times.

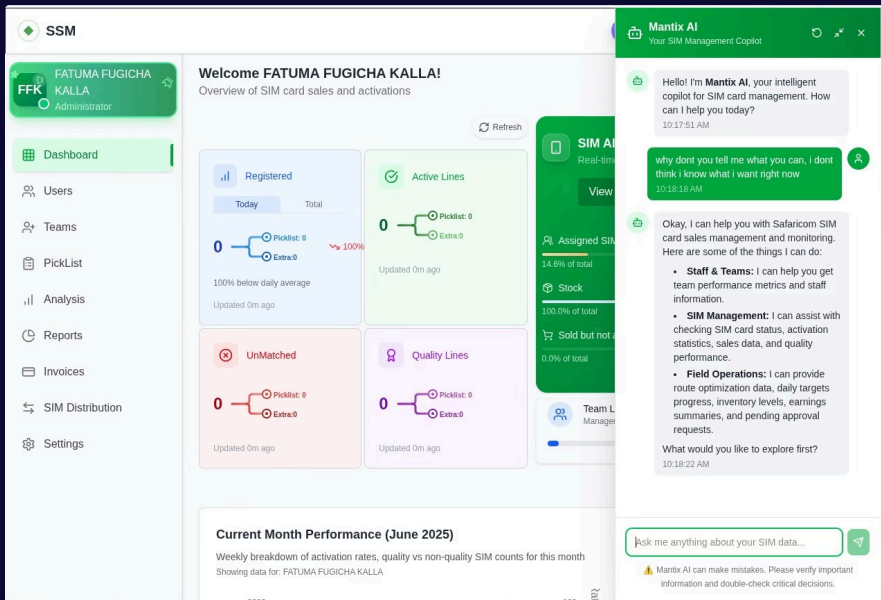

## No Technical Expertise Required

Plain English interface means anyone can use it effectively.

# Built With Modern Technology Stack

## Web: Next.js-based web application

Delivers a responsive, intuitive, and high-performance user interface.

## Mobile: Native Android application

Ensures seamless user experience and optimal performance on mobile devices.

## AI Engine: Natural language processing and machine learning

Powers intelligent interactions, predictions, and automated tasks.

## Backend: Scalable cloud infrastructure

Ensures high availability, reliability, and effortless scaling to meet demand.

# Proof of Concept Results from MVP Testing

23%

## Efficiency Boost

Predicted and delivered exactly, streamlining operations significantly.

4

## Hours Daily Savings

Per team member, freeing up valuable time for strategic tasks.

Instant

## Insights

No more manual report generation, data is at your fingertips.

Proact...

## Issue Detection

AI catches problems before humans notice, preventing potential losses.

High

## User Satisfaction

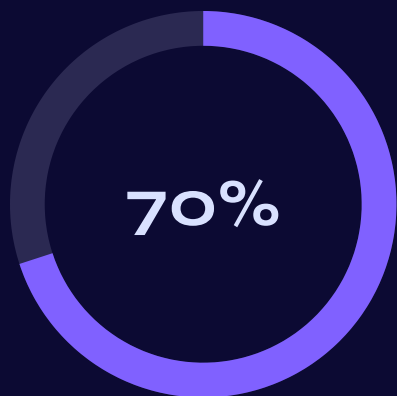

"Like having a brilliant analyst working 24/7" - user feedback.

Hundr...

## of Teams

Identified as ideal early adopters based on current pain points and needs

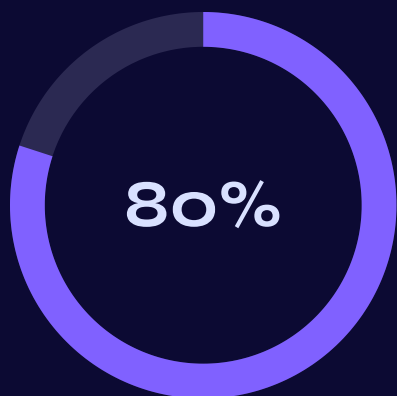

## Addressing a Multi-Million Dollar Market

Market share of Safaricom in Kenya's telecom sector.

Estimated number of SIM cards activated daily in Kenya.

Reduction in administrative costs for distributors using Mantix AI.

Faster fraud detection compared to manual processes.

# From Idea to Income: Revenue Streams

## Subscription Tiers

Flexible pricing with Basic, Pro, and Enterprise levels to suit all business sizes.

## Premium AI Features

Advanced analytics, deeper predictions, and custom reports for enhanced value.

## Mobile Android App

Freemium model with paid upgrades for additional convenience and power.

## API Access

Integration fees for third-party developers, expanding ecosystem partnerships.

## Training & Support

Professional services revenue from tailored training and dedicated support.

## White-label Solutions

Licensing to other telecom operators, extending our reach across markets.

# What's Next: Scaling and Innovation

## Advanced AI Models

More sophisticated predictions and deeper insights using cutting-edge algorithms.

## Multi-language Support

Local language interfaces to cater to diverse markets across Africa.

## IoT Integration

Smart SIM card tracking for enhanced asset management and connectivity.

## Blockchain for Security

Secure transaction verification and immutable record-keeping.

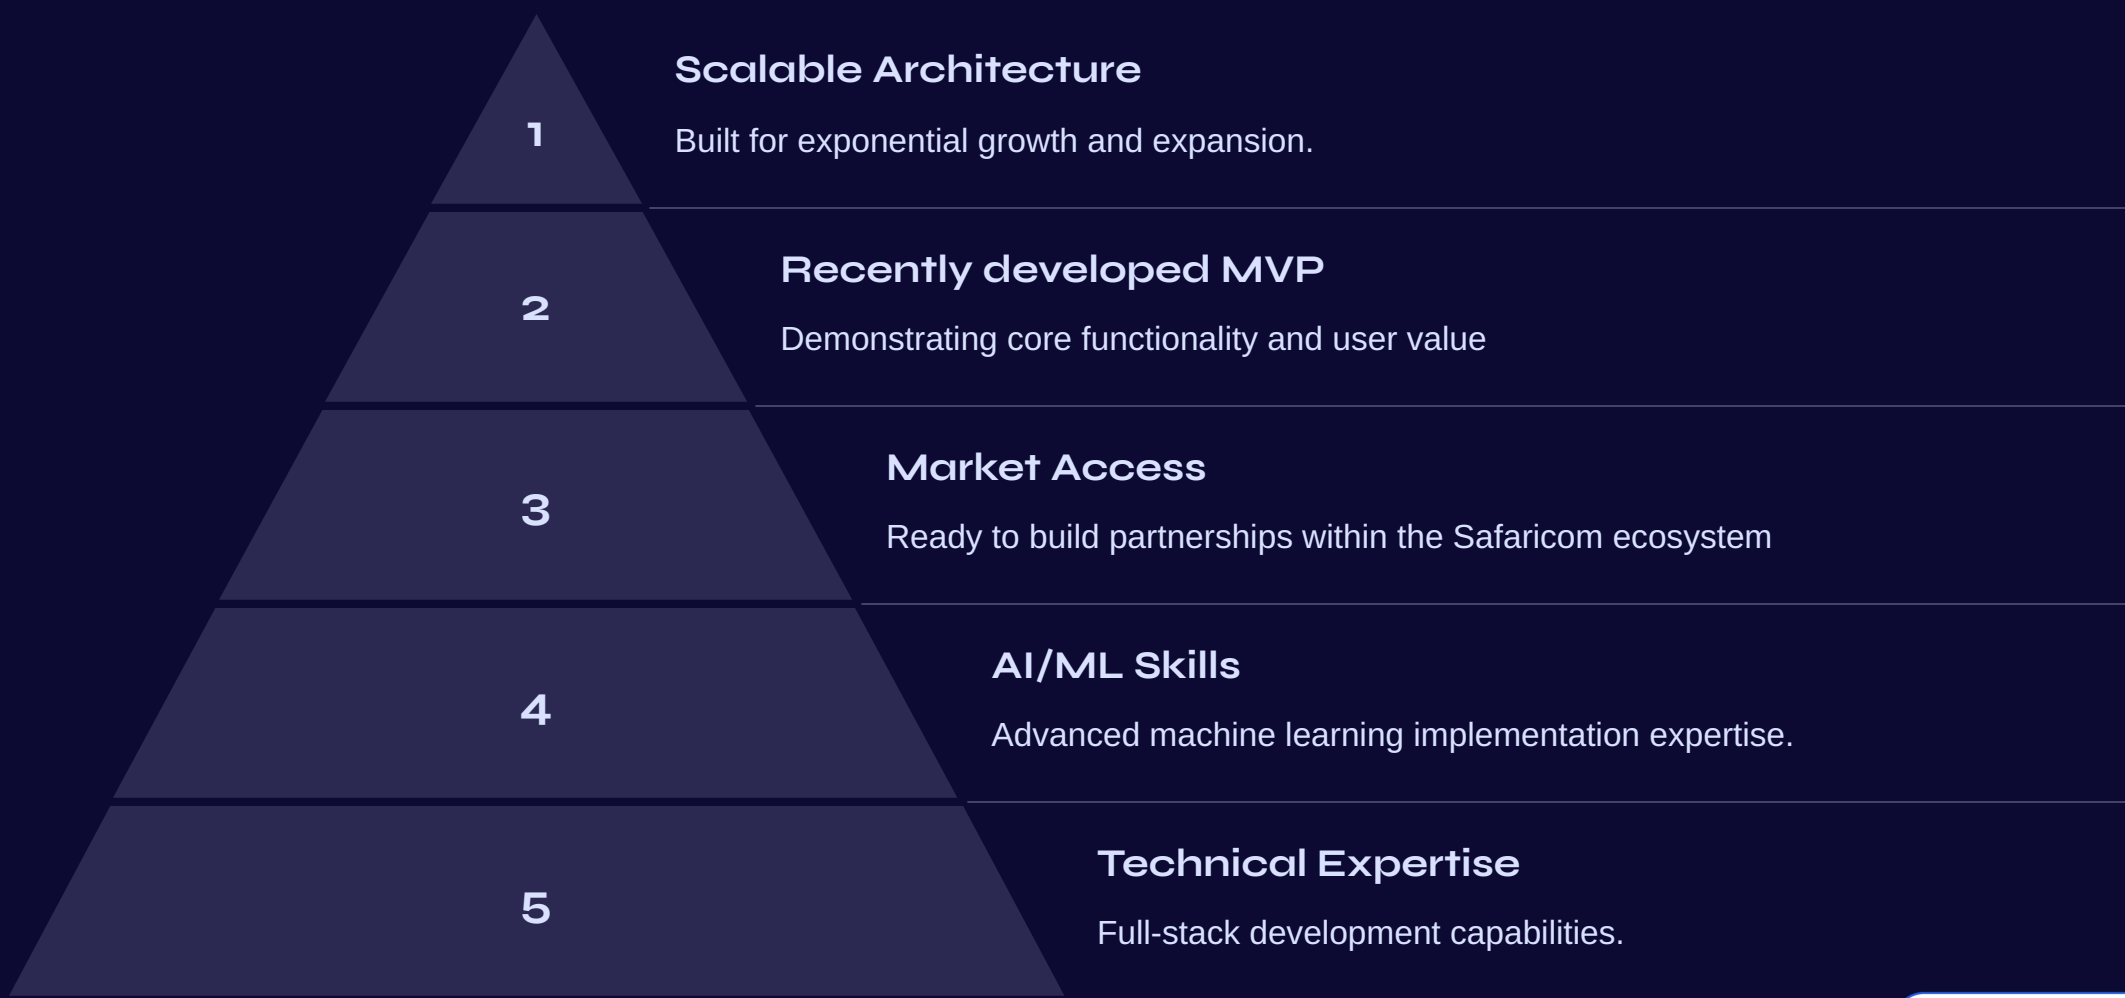

## Regional Expansion

Roll out to other African markets, replicating our success beyond Kenya.

## Partner Ecosystem

Integration with more telecom operators, fostering a collaborative network.
